Welcome

MixPad Genie touch screen smart gateway (Single Live Wire) use a single live wire to supply power, which can directly replace the traditional R6 switch panel, and quickly realize the intelligent upgrade of the space. The product innovatively integrates four interactive modes: physical buttons, screen touch, voice, and APP, as well as Wi-Fi, Bluetooth, and infrared communication methods. It is a new generation of smart switches that integrate lighting, air conditioning, curtains and other devices into one.

Product icon

Quick to use

Download and install the APP

Search for "ORVIBO HOME" in the APP Store or scan the QR code to download and install the "ORVIBO HOME" APP.

Bind account

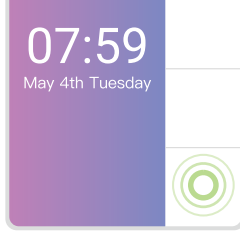

After the device is connected to the Wi-Fi network, the account binding QR code is displayed. Open the "ORVIBO HOME" APP and scan the QR code to complete the account binding.

Basic operation

Button

Button press to achieve smart light control
Support button function customization.

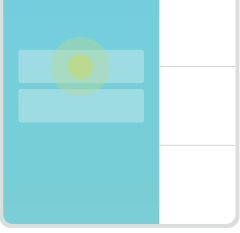

Slide up

Slide up to more devices
Quick control list

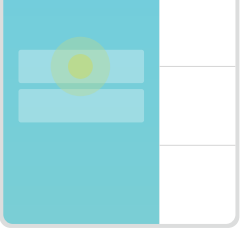

Tap

Tap the first screen device card to control the device status

Long Press

Long press to enter the device control page

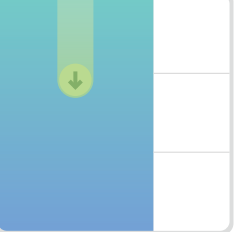

Swipe left and right

Swipe left and right to switch between different device control pages

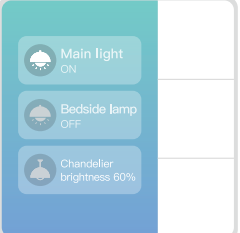

Drop down

Drop down at the top to quickly select device type and settings

Lighting control

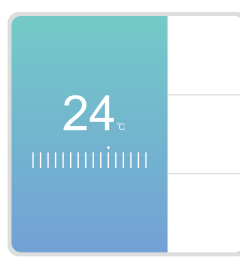

The MixPad Genie is matched with the power bottom box to achieve three-loop light control, and the lights can be quickly turned on/off through buttons, touch screen, voice and APP.

Work with smart switches can support more light control.

Control the air conditioner

The MixPad Genie has built-in infrared function. The air conditioner can be quickly turned on/off AC, mode switching, wind speed adjustment, and temperature control through buttons, touch screen and APP.

Curtain control

With a smart curtain motor, the curtain can be opened, closed, paused and percentage control through buttons, touch screen and APP.

Add device

The MixPad "Add Device" function has the ability to find and add devices.
1. Click "Add Device" on the screen settings page enter searching device state.
2. Find and complete the configuration of the device through MixPad.
* If the configuration fails, please move the device close to MixPad and try again after powering on.

More possibilities

With intelligent curtain motor to realize curtain opening/closing and curtain opening and closing percentage control. With intelligent wireless color temperature lamp, it can realize stepless adjustment of brightness/color temperature.
Add scenarios to realize multi-device combination control. Such as: turn on the lights when going home, turn off the lights when leaving home.
.....

Product Specification

Model	VS2X
Size	86*86*11.4mm
Power input	220V~ 50/60Hz
Power supply	single live wire
Specification	2 gang, Dual control
Load type	LED light, Incandescent light, Energy-saving light
Load range	LED light<150W/loop Incandescent light, Energy-saving light<250W/loop (2 loops)
Communication protocol	Wi-Fi/Bluetooth
IR control	IR940nm
Working environment	Temperature 0-50℃, Humidity <95% RH

备注:

1. 材质：120g双哑粉
2. 尺寸：103*103(mm)
3. 印刷：四色双面印刷
4. 装订方式：骑马钉
